

Abatement Worker

The Role

R3 is looking for Abatement Workers to join our team. In this role, you will remove hazardous materials (like asbestos) safely. You will also help with general site work and demolition when needed. We are looking for reliable workers who follow safety rules and work well with a team.

Responsibilities

- Remove asbestos and other hazardous materials safely
- Set up and take down containment areas
- Follow cleaning and decontamination procedures
- Bag and dispose of materials properly
- Help with demolition and general labour work when needed
- Carry materials and keep the site clean
- Follow all safety rules and site instructions
- Attend safety meetings (toolbox talks)
- Report hazards or unsafe conditions right away
- Use basic hand and power tools safely

Requirements

- Occupational Health & Safety for the Asbestos Worker ticket (required)
- Experience in abatement, construction, or labour work (asset)
- Able to work in confined spaces and wear PPE for long periods
- Able to perform physical job duties, including lifting, carrying, bending, and working in various conditions
